REXOIL

READY ANTIFREEZE

REXOIL READY ANTIFREEZE is a ready to use product that has been premixed with 50% antifreeze and 50% water. It has been developed to prevent damage to water cooling systems from cold weather conditions. It does not contain nitrates. It is mixed with cooling water to protect automobiles, trucks, buses, tractors, construction machines and other vehicles from cold. It is used in industrial cold water circulation systems, solar powered systems, ice skating rinks and similar places.

Properties

- Corrosion inhibitor technology protects metals against all forms of corrosion.
- Protects against winter freezing and summer overheating.
- Shows a good performance in all seasons due to good heat conduction properties.

Approvals and Specifications

- VW TL 774 F
- GM 6277M
- DEUTZ MWM
- BS 6580
- MB-325.0
- Ford WSS-M97B44-D
- MAN - 324 SNF
- Komatsu
